TEMPORARY PARTIAL DISABILITY

The provision of the claimant's social security number is mandatory under Wisconsin Statutes and will be used to identify the claimant. Failure to provide it may result in penalties or delayed payment of benefits. Personal information you provide may be used for secondary purposes [(Privacy Law, s. 15.04(1)(m)].

WC Claim Number	Employee Name
Employee Social Security Number	Employer Name
Injury Date	Insurance Company Name (not adjusting company)

- Each period of Temporary Partial Disability (TPD) is to be entered as a line of compensation on form WKC-13.
- This form will be used to verify TPD payment computations.
- Figure TPD on a weekly basis, Sunday through Saturday. Do not pay for Sundays whether or not they are worked.
- **Attach this form as a part of the WKC-13 showing Temporary Partial Disability paid.**
Read instructions on reverse side before calculating Temporary Partial Disability below.

Are the wages in column 4 below from the same job the employee had at the time of injury? ☐Yes ☐No
If yes, compute and pay TPD, using the "actual" wages in column 5 below that were used to set the TTD rate.
If No, are the wages in column 4 below from a second job that was held at the time of injury? ☐Yes* ☐No
*(Use "expanded wages in column 5 below if earnings were from a 2nd job held at the time of injury and expanded wages were used to set the TTD rate)
Note: If earnings in column 4 below were not from the same job held at the time of injury or were from another full-time or part-time job held at the time of injury and "expanded" wages were **not** used to set the TTD rate, pay TTD, not TPD.

1	2	3	4	5	6	7	8	9
Week Ending	Hours Worked	@ Hourly Rate	Wages Earned	Weekly Wage at Time of Injury*	Wage Loss	% of Wage Loss	TTD Rate	TPD Payment

Calculation:
Step 1: Multiply hours worked in column 2 by rate in column 3= $_____ to get wages earned in column 4 $_____
Step 2: Subtract column 4 $_____ from column 5 $_____ = wage loss $_____(column 6)
Step 3: Divide column 6 $_____ by column 5 $_____= ____% of wage loss (column 7)
Step 4: Multiply TTD rate(column 8) $_____ by % in column 7____%= $_____TPD payment (column 9)

Column 5 $_____-(minus) column 4 = $_____divided by column 5 $_____=____% X (times) $_____TTD rate= $_____TPD

Column 5 $_____- column 4 = $_____divided by column 5 $_____=____% X $_____TTD rate= $_____TPD

Column 5 $_____- column 4 = $_____divided by column 5 $_____=____% X $_____TTD rate= $_____TPD

Column 5 $_____- column 4 = $_____divided by column 5 $_____=____% X $_____TTD rate= $_____TPD

Column 5 $_____- column 4 = $_____divided by column 5 $_____=____% X $_____TTD rate= $_____TPD

Column 5 $_____- column 4 = $_____divided by column 5 $_____=____% X $_____TTD rate= $_____TPD

TEMPORARY PARTIAL DISABILITY INSTRUCTIONS

Abbreviation Key: TTD = Temporary Total Disability; TPD = Temporary Partial Disability

The numbered columns below correspond to the numbered worksheet columns on the reverse side. A completed sample calculation for a two-week period appears at the bottom of this page.

- Answer the question(s) regarding the job where the weekly earnings were earned. TPD is generally paid to workers who return to "light duty" or work part-time on the same job where they were injured or to those who found a new job at lesser wages or hours after the injury. If earnings were not from the same job held at the time of injury or they were from another full-time or part-time job held at the time of injury, pay TTD, not TPD. There is one exception: if the earnings were from a second job held at the time of injury and "expanded wages" were used to set the TTD rate, pay TPD using the "expanded wages" to compute the wage loss.

1. <u>Week Ending</u>: Use the Saturday of the week for which you are computing Temporary Partial Disability (TPD). A week of TPD is Sunday through Saturday.

2. <u>Hours Employee Worked</u>:[1] Enter the number of hours worked during the week. If you are not paying for the waiting period, but you are paying the week, which includes the waiting period, include the hours lost during the waiting period as hours worked during the week.

   [1] TPD calculations involving the 3-day waiting period: Indemnity is due for the first 3 days after the injury <u>only</u> if the disability exists more than 7 calendar days after the day of injury.

   Always count Sunday in the 7 calendar days after the injury to determine if indemnity is due for the waiting period. Sundays are not <u>counted as one of the days</u> in the 3-day waiting period unless the employee worked on Sundays. However, no TPD or TTD indemnity is paid for Sundays.

   If the employee is not entitled to indemnity for wages lost during the 3-day waiting period, ONLY for purposes of computing TPD in columns 2 to 4, below, treat wages lost during the 3-day-waiting period as though the hours were worked and the wages were earned. *Add the hours lost during the 3-day-waiting period to the "hours employee worked" in column 2, below.* Otherwise, you may pay more than the law requires in TPD benefits. This period will need to be recomputed and paid if employee has a renewed period of disability beyond the 7 calendar days.

3. <u>At @ Hourly Rate</u>: Enter the hourly rate at which the employee was paid or would have been paid for the hours worked in #2 above during the week of TPD.

4. <u>Wages Earned</u>: Multiply the hours worked (Column #2) by the hourly rate (Column #3). (If hourly rate is not available, show gross amount earned for the week and skip Columns #2 and #3.)

5. <u>Weekly Wage at Time of Injury</u>: Enter the employee's weekly wage at the time the injury occurred. Use the weekly wage that was used to compute the employee's TTD rate. Use the "actual" wage unless the earnings were from a second job held at the time of injury and "expanded" wages were used to set the TTD rate in which case, use the "expanded" wages.

6. <u>Wage Loss</u>: Subtract the amount earned (Column #4) from the wage (Column #5) at the time the injury occurred.

7. <u>Percent (%) of Wage Loss</u>: Divide the wage loss (Column #6) by the wage (Column #5) at the time the injury occurred.

8. <u>TTD Rate</u>: Use the TTD rate, including an escalated rate, in effect for the weeks(s) of TPD that you are paying.

9. <u>TPD Payment</u>: Multiply the TTD rate (Column #8) by the percent of wages lost (Column #7). (This is the TPD owed for the week.)

Completed Sample:

1	2	3	4	5	6	7	8	9
Week Ending	Hours Emp. Worked	@ Hourly Rate	Wages Earned	Weekly Wage at Time of Injury	Wage Loss	% of Wage Loss	TTD Rate	TPD Payment
4/6/97	20	$7.67	$153.40	$306.80	$153.40	50	204.53	102.27
Calculation 306.80 - 153.40 = 153.40				153.40 ÷ 306.80 = .5 (50.00%)			204.53 x 50% = 102.27	
4/13/97	16	$7.67	$122.72	$306.80	$184.08	60	204.53	122.72
Calculation 306.80 - 122.72 = 184.08				184.08 ÷ 306.80 = .6 (60.00%)			204.53 x 60% = 122.72
